Experience

Full-Stack Engineer • Accenture • March 2016 - Present

- ❖ Developed new features for enterprise and consumer healthcare applications; built out new workflows to enable users to enter, manage, and validate patient EHRs and physician information.
- ❖ Led development on Ruby app with Rails JSON API; Used Symfony2, Twig and Javascript to build templatable reports and UIs; Refactored legacy code; Reworked module design and output to meet evolving client needs; Mentored coworkers on Git.

Strategist (Digital Production) • Trilogy Interactive • 2011 - 2015

- ❖ Led execution on email campaigns and web pages using HTML and CSS for nationwide clients, including Senators Dick Durbin & Chuck Schumer.
- ❖ Drove testing and analytics program; results helped cut email production time by up to 30 minutes, improve fundraising performance by up to 4%, and open rates by 5%.

Skills

Ruby, Rails, Javascript, HTML5, CSS3, jQuery, Backbone.js, React.js, Redux
PostgreSQL, MySQL, Git, Bootstrap

Projects

[enginestarter.xyz](#) • [github](#)

Kickstarter-inspired crowdfunding site.

- ❖ Built using Backbone.js and RESTful JSON Rails API.
- ❖ API controller creates project and associated reward objects in single database transaction to avoid creating orphan rewards.
- ❖ Incorporates third-party APIs to support image upload and markdown text editor.

[snake.js](#) • [github](#)

The classic game of snake created with jQuery and CSS.

- ❖ Board generates variable number of apples.
- ❖ High score stored locally in session cookie.

Education

[App Academy](#) • San Francisco, CA • June - September 2015
Full-stack web development course • Acceptance rate < 5%

UC Berkeley • 2013
BA • Political Science • 3.4 GPA
