Projects

enginestarter.xyz · github
Kickstarter-inspired crowdfunding site.
- Built using Backbone.js and RESTful JSON Rails API.
- API controller creates project and associated reward objects in single database transaction to avoid creating orphan rewards.

snake.js · github
The classic game of snake created with jQuery and CSS.
- Board generates variable number of apples and stores local session high score.

Chess · github
- Command-line implementation of Chess with an AI opponent.
- Computer's cursor and moves are visible during its turn.

Skills

Ruby, Rails, Javascript, Backbone.js, jQuery, HTML5, CSS3, SQL, git, Bootstrap, Bitbucket

Experience

Strategist (Digital Production) · Trilogy Interactive · 2011 - 2015
- Led execution on email campaigns and web pages using HTML and CSS for nationwide clients, including Senators Dick Durbin, Chuck Schumer, and Patrick Leahy.
- Drove testing and analytics program; results helped cut email production time by up to 30 minutes, improve fundraising performance by up to 4%, and open rates by 5%.

Intern · BCL Technologies · 2010 - 2011
- Built web pages using HTML and developed content for new product launches on e-commerce site.

Education

App Academy · San Francisco, CA · June - September 2015
Full-stack web development course · Acceptance rate < 5%

UC Berkeley · 2013
BA · Political Science · 3.4 GPA
